

**Tip** *What does transversely sealed mean?*

Did you know that all of L-com's new ruggedized RJ45 plugs, jam-nuts, flanges and in-line receptacles are transversely sealed? As the name implies, this means that they are waterproof. The parts meet or exceed IP-68 rating with or without dust covers or mated connectors engaged with the receptacle. The plugs and jacks are waterproof even without a mated cap or connector when submerged under 1 meter of water for up to two days! Your equipment will not be at risk from moisture or dust even if you lose or forget the dust cap!
