

**Tip**

## Defining 90° angled cable assemblies

Angled connector hoods help connect cables in tight places. L-com now offers four options each for HDMI and DVI style connectors. The photos below detail the connector position relative to the cable entry direction.

### HDMI Style Connectors

For HDMI style connectors, the position of the connector's long side is key in determining the correct angle for your application.

Right Exit  
HDRA

Long side of connector

Left Exit  
HDRA2

Top Exit  
HDRA3

Long side of connector

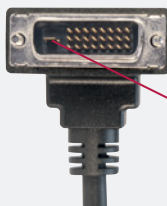

Bottom Exit  
HDRA4

### DVI Style Connectors

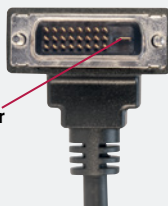

For DVI style connectors, both Single Link and Dual Link types, the flat blade of the connector is key in determining the correct angle for your application.

Bottom Exit  
DVID\_-RA

Flat blade of connector

Top Exit  
DVID\_-RA2

Left Exit  
DVID\_-RA3

Flat blade of connector

Right Exit  
DVID\_-RA4
