Tip | *USB 3.0 Machine Vision Panel Mount Cable Assemblies*

L-com now offers a panel mount variation of its Machine Vision cable assemblies. The four imbedded screw slots allow this extension cable to be securely mounted to a panel, while maintaining a secure connection with the side thumbscrews.

For this type A receptacle, the top and bottom holes are used to mount the cable to the panel, while the side holes are used to screw down the mating connector.

Panel Mounting

Cable Thumbscrews
